COMPLETE CRM

Built end-to-end for operations, bookings and reporting

APP STORE

Multiple apps shipped with React Native, Expo and Swift

PROFILE

I work at the intersection of software, operations and business. My strength is understanding a concrete need, designing a simple solution and carrying it through to completion. At Nomad Properties, I built a complete internal CRM system covering booking data, reporting, dashboards, authentication, integrations and automated workflows. I have also shipped multiple App Store apps using React Native and Expo, and developed native Swift functionality when the platform required it. I thrive with clear ownership, short decision paths and responsibility for quality after release.

EXPERIENCE

Head of IT

Nomad Properties

2026 – present

- Built the company's complete CRM and operations platform covering bookings, reporting, dashboards, integrations and automated workflows.
- Work end-to-end with Next.js, TypeScript, PostgreSQL, APIs, authentication, Cloudflare Workers, Pages and storage.
- Translate business requirements into secure and reliable solutions with a focus on data quality and performance.

Support & QA Specialist

Estatetool A/S

2025 – 2026

- Technical support, QA, troubleshooting and testing of releases and customer-facing flows.
- Turned user feedback and issues into concrete product and process improvements.

Support, Customer Success & Key Accounts

We are Safe

2022 – 2025

- Progressed from technical support to Head of Support, partner, and responsibility for customer success and key accounts.
- Worked with operations, leadership, customer journeys, CRM, SQL, Firebase and internal systems.

Volunteer – including Operations Lead for Emergency Response

Roskilde Festival

2024 – present

- Held operational responsibility in the Emergency Response Office and coordinated across volunteers, police and fire services.

RESULTS

#2 Ranking in the Danish App Store	600+ Users in an app's first week	CRM From data model and authentication to UI and operations
--	---	---

TECHNOLOGY

01	WEB & MOBILE Next.js · React Native · Expo · Native Swift
02	BACKEND & DATA TypeScript · PostgreSQL · SQLite · Firebase / NoSQL
03	CLOUD & INTEGRATIONS Cloudflare Workers · Pages · Storage · REST APIs · Auth
04	WORKFLOW Git · GitHub · QA · Troubleshooting · Release

CAPABILITIES

01	END-TO-END PRODUCT DEVELOPMENT From requirements and architecture to release, operations and continuous development.
02	TECHNICAL PRODUCT UNDERSTANDING Connects user needs, data, systems and business.
03	OPERATIONS & SECURITY Access control, logging, performance and reliable deployment.
04	COMMUNICATION & OWNERSHIP Makes technical decisions understandable and takes responsibility for the outcome.

ADDITIONAL PROFILE

WORKING METHOD AI as a working tool I use AI to challenge solution proposals, accelerate research and implementation, identify issues and structure large amounts of relevant information. It is used as a controlled step in the workflow – not as a replacement for technical judgement, security or quality assurance.	BACKGROUND Education & earlier experience Upper secondary technical education in Mathematics & Computer Science, including project management. Earlier experience from CIMT Servicedesk, SuperBrugsen and Føniks Computer.	SELECTED PROJECTS PartyPal og BUSBUS PartyPal gained 600+ users in its first week and reached No. 2 in the App Store. BUSBUS was developed to plan and coordinate volunteers for Roskilde Festival's largest food stand.
